

Press and IR Release

Schaeffler AG shares move up to MDAX

HERZOGENAURACH, 2026-03-05.

- Schaeffler shares will be included in the MDAX effective March 9, 2026
- Increased trading volume highlights the growing attractiveness of Schaeffler shares
- Important milestone on the way to becoming the leading Motion Technology Company

As part of an unscheduled review of the index on March 4, 2026, Deutsche Börse has decided to include Schaeffler AG's shares in the MDAX. The basis for this rise is the positive share price trend in recent months. The first trading day of Schaeffler shares in the MDAX, the index for mid-sized companies on the Regulated Market of the Frankfurt Stock Exchange, will be March 9, 2026.

Schaeffler CEO Klaus Rosenfeld says: "We are delighted that Schaeffler is returning to the MDAX. That is an important milestone for us. Our strategy of making the Schaeffler Group the leading Motion Technology Company is making an impact."

Its rise to the MDAX comes in the wake of Schaeffler AG's merger with Vitesco and standardization of its classes of shares. All shareholders of Schaeffler AG hold registered shares and have full voting rights. The increased trading volume demonstrates the increasing attractiveness of Schaeffler shares for investors. The new Schaeffler shares have performed well since their launch on October 2, 2024, closing at 8.20 euros on March 4 (Xetra).

The merger with Vitesco has considerably expanded the Schaeffler Group's product portfolio. Based on this, the company defined a new structure with four product-oriented divisions and eight product families. Schaeffler's strategic ambition is to become a top 3 global player with all four divisions. Additionally, Schaeffler wants to generate approximately ten percent of its revenue from new, high-potential activities in growth areas such as humanoid robots, defense, and Aerospace by 2035.

The MDAX consists of the 50 largest public companies below the DAX. Inclusion depends on the market capitalization of the free float. Moving up to the MDAX is expected to result in additional funds and market participants including Schaeffler

shares in their portfolios, which, experience shows, is likely to draw even more attention to the shares.

Forward-looking statements and projections

Certain statements in this press release are forward-looking statements. By their nature, forward-looking statements involve a number of risks, uncertainties and assumptions that could cause actual results or events to differ materially from those expressed or implied by the forward-looking statements. These risks, uncertainties and assumptions could adversely affect the outcome and financial consequences of the plans and events described herein. No one undertakes any obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events or otherwise. You should not place any undue reliance on forward-looking statements which speak only as of the date of this press release. Statements contained in this press release regarding past trends or events should not be taken as representation that such trends or events will continue in the future. The cautionary statements set out above should be considered in connection with any subsequent written or oral forward-looking statements that Schaeffler, or persons acting on its behalf, may issue.

Schaeffler Group – We pioneer motion: The Schaeffler Group has been driving forward groundbreaking inventions and developments in the field of motion technology for 80 years. With innovative technologies, products, and services for electric mobility, CO₂-efficient drives, chassis solutions and renewable energies, the company is a reliable partner for making motion more efficient, intelligent, and sustainable – over the entire life cycle. Schaeffler describes its comprehensive range of products and services by means of eight product families: From bearing solutions and all types of linear guidance systems through to repair and monitoring services. Schaeffler is with around 110,000 employees and more than 250 locations in 55 countries, one of the world's largest family-owned companies and one of Germany's most innovative companies.
