

Administrator 4 Software

for the devices FAG DETECT X1s and FAG ProCheck

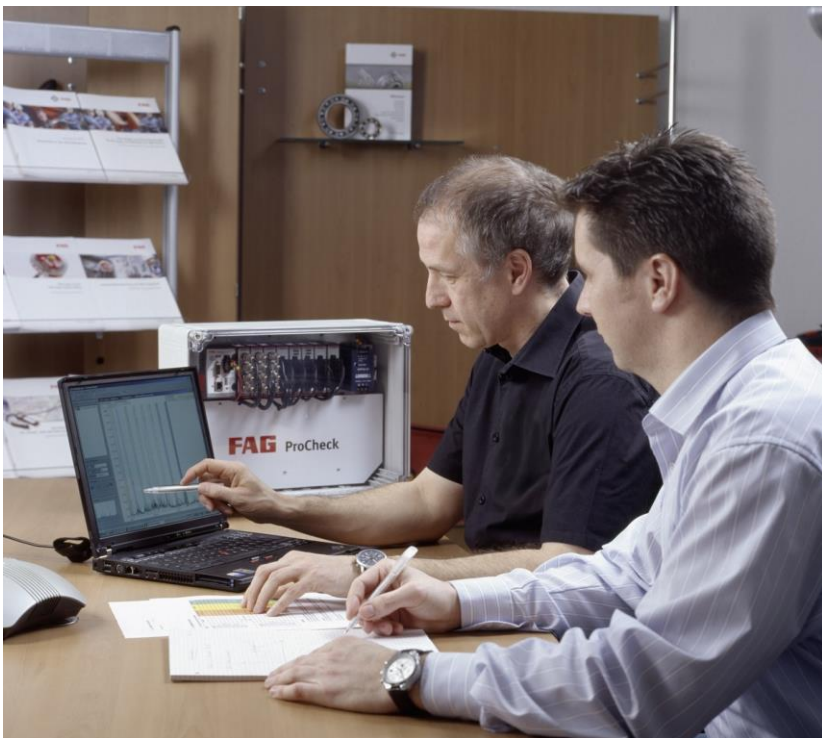

Training objectives

During this training the participants learn the significance and application of each module of the Administrator 4 software in order to configure, measure and analyse machine vibration.

The handling of the Data Viewer – a special analysis tool – and the technology to communicate with the devices is learned and part of the exercises.

Training contents

- ▶ Vibration basics
- ▶ Signal processing basics
- ▶ Vibration sensors
- ▶ Characteristic values
- ▶ Overview of the Administrator functions
- ▶ Administrator database
- ▶ Administrator data management
- ▶ Data Viewer
- ▶ Analysis of vibration data
- ▶ Automatic measurement data transfer
- ▶ Communication options

Target Group

Technicians and engineers working in maintenance

Previous knowledge in the field of condition monitoring and vibration analysis is recommended.

Duration

2 days
from 9:00 to 17:00

Dates
