

Training course description

Linear Products and Applications

► Training course objective

This training course is dedicated exclusively to linear products and applications, and gives participants an overview and an introduction to Schaeffler linear technology. The course covers both basic linear guidance systems and driven linear units. The introduction starts with the characteristics and functions of linear guidance systems, and guides the participants seamlessly into the Schaeffler Group's wide range of product groups. In addition to knowledge of the products themselves, participants also get to know the factors that have to be considered when selecting the correct linear guidance systems based on the relevant requirements. For employees/sales partners who have a commercial focus, this training course provides a better understanding of customers' requirements and component designations.

► Content of the training course

- Linear guidance system design and types
- Components of linear guidance systems
- Designations
- Driven linear units

Target group

Primarily participants from the commercial sector.

Prerequisites:

ST04014 Products and bearing supports (1) - Introductory product overview

Duration

1 day

Training location

Schaeffler Eltmann, Industriestraße 2, 97483 Eltmann

Bookings under

ST04017

Registration

Schaeffler Technology Center – Training: Ms. Karin Morgenroth

E-mail: schulungszentrum@schaeffler.com

Other

Any costs that may arise for overnight accommodation must be covered by the participants themselves. We will be happy to assist you in selecting accommodation.

Conditions for participation

- General conditions can be found on our website:
http://www.schaeffler.com/remotemedien/media/_shared_media/05_products_services/training/training_conditions_de.pdf
- The registration deadline for this training course is 14 days before the course begins.
- We reserve the right to cancel under-subscribed training courses at least 14 days before they begin, and to not include registrations submitted for courses that are over-subscribed.
- Cancellations made by participants after their registration has been confirmed will be subject to a € 40 processing fee. If the participant cancels within 14 days of the start of the training course, however, 50% of the training course fee will be invoiced. This regulation will not be enforced if a replacement participant is directly named when the initial participant cancels.
